

Colour backgrounds

This background was created using a spray bottle with alcohol inks on cardstock. A stencil was placed over the top to draw out the blended colours in the background.

A very simple but sweet stamping on grey cardstock, then blending a mauve ink around the edges to give a cloudy background look to the card

Fun with 4 watercolours (wet on wet) in simple layered strokes then applying salt to give a dotted sea theme to the background. Embellished with a sea themed die and machine cut sentiment

Fun workshop creating marbled backgrounds using shaving foam, food dye and gloss photo paper to create the background, with a simple silhouette die cut to top it.

More fun with watercolours, but this time inside an embossed stamped pattern. Placed on mirrored card and topped with a simple sentiment.
