

Masks, stencils and outlines

The lace background for this card was created using double sided adhesive sheet with either a stencil or piece of lace. Apply first colour glitter, then remove stencil/lace and apply the second. It makes a simple and pretty background for some words to be added to.

Using 2 circle masks you create yourself to blend in ink the circular sky 'window' then a stamp and die cut. An easy and fun way to learn a new technique and have a card at the end.

In this case the cover of the card has had a stencil outline of hearts cut into it to form the mask, with a paper strip behind it to highlight.
